Description

With the RTK Base-Rover Calibrated Surveyor Kit you will have everything you need to start your surveying tasks with RTK and centimeter level accuracy.

For Android users, use your preferred app and connect to the receiver via USB or Bluetooth.

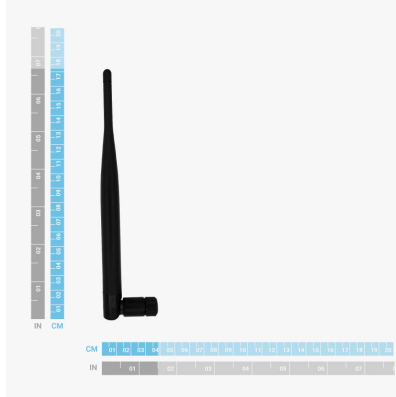

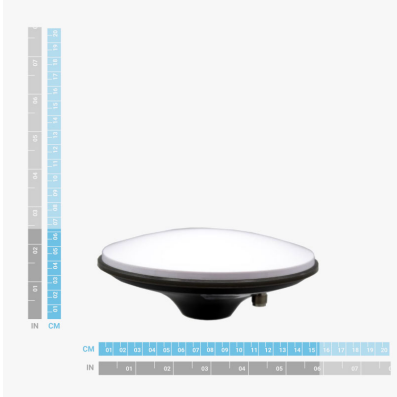

For iOS users, currently only connection over BLE is possible, and only SW Maps app is supported.

This kit works autonomously, no need to use external NTRIP services.

Good to know:

- You can power and connect to the GNSS receiver with only one USB OTG cable
- You can also use Bluetooth 2.0 and BLE
- Fits any smartphone from 5.3cm to 9.3cm with or without case
- You can also use a tablet with this kit (tablet holder not included)
- Smartphone is not included
