

simpleGNSS Pro

Includes:

- 1 simpleGNSS Pro board (NEO-F10N)

More info about the product!

simpleGNSS Pro has several different configurations to provide you with flexibility:

SKU	Variation Name
AS-GNSS-F10N-L1L5-NH-00	Without headers
AS-GNSS-F10N-L1L5-HS-00	Headers soldered (+26€)

Description

simpleGNSS Pro allows you to evaluate sub-meter dual band (L1/L5) GNSS positioning technology. It's based on u-blox NEO-F10N and can be used standalone. Or connected with Arduino, Ardupilot / Pixhawk (JST connector), Raspberry Pi, Nvidia, STM32 and ESP32 platforms, as a shield. It can provide up to 10 positions every second.

This board is ideal for vehicle and object tracking, especially if you need to improve the GPS accuracy from the traditional 2-3 meters to sub 1 meter.

More details available in the Specification and Documentation tabs.

Good to know:

- This product doesn't do RTK.
- This product is compatible but doesn't include multiband GNSS antenna, which is necessary to use the product.
- The module will not give best performance with any GNSS antenna, for optimum performance we recommend our Budget Survey Tripleband or ANN-MB1 antenna.
- This board is recommended if you want to test u-blox NEO-F10N performance.
- The onboard XBee socket can be used to expand functionality with Plugin accessories (MR/LR/XLR radios, Bluetooth, Ethernet, WiFi, RS232, Canbus, L-Band, 4G/3G/2G).
- Compatible with ArduSimple plastic case
- Ardupilot compatible via JST-GH standard connector
- Timepulse output and Event input
- This product is a cheaper alternative including better accuracy to boards with NEO-M9N

Specifications

NEO-F10N features

- Sub meter level precision
 - <1.5m in standalone mode
 - <0.9m standalone with SBAS coverage
- Update rate
 - Default: 1Hz
 - With maximum performance: up to 8Hz
 - With reduced performance: up to 10Hz
- Multi band: L1, L5 support
- Multifrequency and Multiconstellation:
 - GPS: L1C/A L5
 - Galileo: E1-B/C E5a
 - BeiDou: B1C B2I
 - NavIC: SPS-L5
 - QZSS: L1Sb
 - SBAS: WAAS, EGNOS, MSAS, GAGAN and SouthPan
- Start-up times:
 - First position fix: 27 seconds (cold), 2 seconds (hot)
- Operating temperature Range: -40 to +85deg
- Documentation: RED, RoHS, UKCA

TOP VIEW

Description	Name	Name	Description
GPS TX1 3.3V level	TX1	GND	Must connect to GND
GPS RX1 2.7V - 3.6V level	RX1	GND	Must connect to GND
XBee RX 2.7V - 3.6V level	RX2	5V_IN	4.5-5.5V optional input voltage Can also be output via switch
XBee TX 3.3V level	TX2	IOREF	N/C when set as input Can be 3.3V output via switch
Don't connect	DNC		
Input for timestamp 3.3V level	EXTINT		
Timepulse out 3.3V level	TPS		
Ground	GND
